We get a lot of people asking us, "What is **'natural'** wine?" You've read the ingredients list on the back of your groceries before, right? Imagine if wine were required to have the same kind of list. Ammonium bisulfate, chitosan, carboxymethylcellulose, to name a few things allowed in conventional wine. Natural wines have a very short list; grapes, naturally occurring yeast, and sometimes a little sulfur. **Natural wine is just the good stuff**, born from the earth and lovingly shaped into wine by the vigneron (grape grower and winemaker).

Organic production is the standard we hold all of our wines to.

Certification in organic farming isn't a necessity, as long as the producer is committed to the practice. We also source our wines from sustainable producers who use minimal fertilizer or pesticides only when necessary. While 'sustainability' is a broad spectrum, we take all efforts into consideration when we select wines.

Our favorite wines come from **biodynamic** producers. Biodynamics is a farming science and philosophy courtesy of Dr. Rudolph Steiner. It's rich in complexity, but to sum it up, the winemaker treats the vineyard and the surrounding area as one large ecosystem. All things are considered: insects, animals, other vegetation, and even the phases of the moon. Biodiversity and minimal intervention are the main goals. **These wines truly speak from the Earth and give the word 'terroir' meaning.**

If you have any **questions** about a particular wine, farming styles or just looking for suggestions on what we are digging right now, **just ask!**

- FRANK KINYON, **BEVERAGE DIRECTOR**

How on Earth do I use this list?

Good question! This isn't your run-of-the-mill wine list. First, it is separated by style (sparkling, white, skin contact, rosé, red). We then further divide the list by character, the **vibe** if you will. We do this to encourage you to venture out and try new wines that compliment what you already know you love. There's a lot of wine out there, **try something different!**

SPECIAL FEATURE EPOCH OF THE JURASSIEN AGE

No other wine region in France has exploded in popularity quite like the Jura. France's smallest wine region, the Jura is tucked between Burgundy and the Jura mountains along the Swiss border. This remote region was largely left alone up until two decades ago, when the wines began to grow in popularity. Scarcity is the issue today, with global demand and very little production raising prices to the level of Burgundy.

The region is known for 5 main grape varieties; pinot noir, chardonnay, trousseau, pousard and savagnin. The distinctive oxidative style of Jura whites, known as *sous voile*, is unique, but not solely, what the region is capable of. In fact, most of the whites below (unless otherwise noted) are done in a more traditional style (known as *ouillé*, or filled), creating elegant, aromatic and textured wines.

ANNE + JEAN-FRANÇOIS GANEVAT

siblings anne and jean-francois (aka fanfan) run what is the most sought-after domaine in the jura and always notoriously difficult to find; they make 35 to 40 different wines each year from 17 different local varieties with just 8.5 hectares of land, all of it biodynamic

SKIN CONTACT WHITE DIP YOUR TOES

(aka Orange Wine)

While white wine is made with zero skin contact, orange wine is made when white grapes rest with their skins for a prolonged period. This process adds tannin, texture and new aromas; seriously fun and can lead to interesting food pairings. The following wines are best for the uninitiated or for easy drinking.

RED STRUCTURED

These are wines with a strong presence of tannin. Tannin is a characteristic of red wines (and orange) that causes a drying affect on your palate. This can be harsh if the wine is sipped on its own, but add in fatty, rich food and you've got a glorious combination.

RED FUNKY

What is funk in a wine, you ask? It's brett (brettanomyces), a particular strain of wild yeast that can sometimes effect natural wines. There are those who love it and seek it out. For those unfamiliar, think barnyard, wet wool, band-aids, acetone, etc.; ranging in intensity from wine to wine. Traditionalists would say these are flaws, but in natural wine, mother nature does what mother nature wants.
